(57) Abstract :

The present invention relates to a stackable smart footwear rack and a cabinet housing the stackable smart footwear rack. The present invention provides easy access to organize, store and retrieve footwear in the racks in addition to providing efficient utilization of storage space in a smart and intelligent manner by means of human machine interface and sensors coupled to motor mechanisms. The present invention also helps negate disorganized arrangement of footwear in the racks and is easy to use thereby contributing to a comfortable lifestyle for people of all age groups. Additionally, the present invention also provides a means to minimize any incidences of dust, odor or dirt in the cabinets and racks due to soiled footwear leading to increased levels of hygiene when handling the contents.
