(57) Abstract :

The present disclosure pertains to a position determining system 100 comprising a processing unit 102, a positioning unit 104, and a GSM module 106 coupled with one or more objects. Processing unit 102 can be configured to communicate with GSM module 106 of the one or more objects, and further actuate positioning unit 104, and determine position of the one or more objects. Based on the determined position, a set of alarm signals can be generated, and correspondingly illumination sources, such as LED and bulb can get illuminated, and acoustic signal generator, such as alarm and buzzer can start ringing.
