(57) Abstract :

The present disclosure discloses an ergonomic commode chair 100 to aid disabled persons, bed-ridden patients, and old people in defecation. The ergonomic commode chair 100 can include a seat 102 with a cavity, a detachable section 114 to cover and uncover the cavity of the seat 102, a sliding tray 110 having a metallic seat and a disposable bag 112. When the chair 100 is to be used by an entity, the tray 110 is slid forward and is fixed at a specific position with the help of electromagnets 126. After usage, the bag 112 fixed with the tray 110 can be detached from the chair 100 and can be disposed off.
