(57) Abstract :

The present disclosure discloses an ear tip 100 having a funnel shaped inner support member 102, an outer cover 104 coupled to the inner member 104 such that a gap is created between the outer cover 104 and the funnel shaped inner support member 102. The ear tip 100 includes flexible scales 106 configured between an outer surface 104 of the funnel shaped inner support member 102 and an inner surface of the outer cover 104. The ear tip 100 also includes holes 108 that are configured at the outer cover 104 to allow passage of air.
