(57) Abstract :

The present disclosure discloses a reusable adsorbent pad 100 comprising: a first layer 102 comprising a plurality of pores extended along a first top end and a first bottom end of said layer 102, wherein the first layer 102 may be made up of anti-microbial material and configured to adsorb moisture and kill microbes present in the adsorbed moisture; and a second layer 104 made up of aromatic material, wherein a second top end of the second layer 104 is placed in tandem with the first bottom end of the first layer 102.
