(57) Abstract :

The present disclosure pertains to a grilling apparatus (100) including a housing (102), where the housing includes a framework (104). The framework (104) includes a central supporting elongate member (106), a set of bars (108), and a first circular component (110). The apparatus (100) include a motor (112) and a controller (114). The motor (112) and the controller (114) facilitates rotation of the central supporting elongate member (106) with help of the first circular component , where the rotation enables movement of the set of bars (108), where the set of bars (108) are adapted to accommodate one or more food items and facilitate cooking of one or more food items.
