(57) Abstract :

A multi-bit screwdriver is disclosed. The screwdriver includes an elongate body having a first end, a second end, and a lateral surface between the first end and the second end to form an interior cavity. The screwdriver also includes a plurality of screwdriver bit assemblies disposed on the interior cavity of elongate body. Each of the plurality of screwdriver bit assemblies has a screwdriver bit on one side and an interlocking portion on another side to allow another screwdriver bit assembly of the plurality of screwdriver bit assemblies to interlock with the corresponding screwdriver bit along the lateral surface.
