Filing Date	:NA	

(57) Abstract :

The present disclosure pertains to a ballistic protection device (100) including a sheet (102), one or more windows (104) configured with the sheet (102) at a first pre-determined position, where the one or more windows (104) facilitate viewing an entity, a linkage assembly (106) coupled between the one or more windows (104), where the linkage assembly (106) facilitate holding at least one weapon, and where the at least one weapon enables shooting the entity. The linkage assembly (106) includes a rotating base (108) to facilitate rotation of the at least one weapon from a first pre-determined angle to a second pre-determined angle, one or more fasteners (110) configured with the rotating base (108), where the one or more fasteners (110) enable supporting the at least one weapon on the rotating base (108), and where the linkage assembly (106) facilitate mobility of the at least one weapon during targeting and shooting the entity.
