(57) Abstract :

A foot actuated toilet flushing apparatus 100 for flushing a toilet is disclosed. The disclosed apparatus 100 includes an elongated member 102 having a first section 104 and a second section 106. The first section 104 configured at a bottom end of the elongated member 102, and the second section 106 configured at a top end of the elongated member 102, and adapted to activate a flushing element 108 of a toilet. An actuating unit 202 operatively configured in between said first section 104 and the second section 106, such that upon actuation of said actuating unit 202 by a user, said second section moves, and correspondingly exerts a predefined force on the flushing element 108 to facilitate flushing.
