(57) Abstract :

The present disclosure relates to a device for automatic hand scrubbing, washing, and drying, said device comprising: a receptacle (102) for allowing a user to measure size of his/her hand, based on which a scrubbing glove-shaped faucet of measured hand size is activated such that the activated scrubbing glove-shaped faucet appropriately grips the user's hand; wherein said activated scrubbing glove-shaped faucet comprises a left hand washing chamber (104) and a right hand washing chamber (106), each of said left and right hand washing chamber comprising four walls (i,ii,iii and iv) with an upper zone (104A/106A) and a lower zone (104B/106B) such that palmer surface of said user's hand is in touch with the walls, and back of the user's hand remains in open space inside the respective washing chamber so as to accommodate user's palm to allow one or more brushes to come in exact spaces of the palm to clean specified areas without hurting the hands.
