(57) Abstract :

The present disclosure pertains to a method and apparatus for formulating fly repellent solution. The method includes steps of mixing of one or more essential oils, and one or more fly repellent ingredients with a pre-determined quantity of water. The method includes step of boiling, of the one or more essential oils, and the one or more fly repellent ingredients along with the pre-determined quantity of the water at a pre-determined temperature, and cooling, of solution obtained after boiling the one or more essential oils, and the fly repellent ingredients. The solution is filled in a container adapted to accommodate and receive the fly repellent solution, and where the container facilitates in dispensing the fly repellent solution for repelling one or more flies.
