(57) Abstract :

The present disclosure relates generally to pharmaceuticals. More specifically, the disclosure is directed to a pharmaceutical composition comprising a pharmaceutically active component and an excipient, lyophilized pumpkin seed mucilage obtained from bio-waste pumpkin seeds. The mucilage is a suitable excipient for functioning as a binder, a film former, a mucoadhesive agent, a release modifier, or combinations thereof. The disclosure also provides a process of preparation of the lyophilized pumpkin seed mucilage.
