(57) Abstract :

The present disclosure provides an indicator and parking light system (200) for an automobile including a parking light relay (204) activated by the activation of an auxiliary relay (205) and configured to blink a plurality of indicator lights (210) positioned on either side of the automobile. An indicator switch (206) of the system (200) may be configured to blink a pair of indicator lights positioned on front and rear of one side of the automobile and upon blinking of the pair of indicator lights, an electronic control unit (ECU) (203) deactivates the auxiliary relay (205) that limit the indicator light of one side of the automobile to blink.
