(57) Abstract :

The present disclosure relates generally to wound healing compositions. More specifically, the disclosure provides a wound hydrating composition for topical application comprising amino acids obtained from egg yolk, bovine serum albumin, or their combination, Curcuma longa, glycerine, and 2-amino-2-methylpropanol. The composition supplements nutrients to the wounds and balances the amount of moisturization required for wound healing without drying or slowing the progress of healing. The disclosure also provides a method of preparing the composition.
