(57) Abstract :

The present disclosure relates generally to pharmaceuticals. More specifically, the disclosure provides a solid dispersion composition comprising Fenoprofen Calcium, 2-hydroxypropyl-P-cyclodextrin, polyvinylpyrrolidone and a surface active agent. The components together possess a synergistic effect to produce solid dispersions with high solubility and improved dissolution profile which the pure drug- Fenoprofen Calcium does not possess. The present disclosure also provides a method of preparation of the composition.
