(57) Abstract :

TITLE: WATER TANK CLEANING APPARATUS ABSTRACT A water tank cleaning apparatus (100) comprising: a frame (102) comprising rest bars (104a-104d) to support components of the water tank cleaning apparatus (100); a crank lever (106) is rotated by a user in a direction selected from a clockwise direction or an anti-clockwise direction; a central sleeve (108), wherein a movement of the central sleeve (108) depends on the direction of the rotation of the crank lever (106); and a brush assembly (112) moved in an upward direction or a downward direction through linkage bars (110a-110b), based on the movement of the central sleeve (108), wherein the brush assembly (112) comprises: a fixed brush (122) to clean a base of a water tank (134); and sliding brushes (124a-124b) housed inside the fixed brush (122), to be extended in an outward direction or retracted back in an inward direction to clean side walls of the water tank (134). Claims: 10 Figures: 11 Figure 1A is selected
