(57) Abstract :

Title: ELECTRIC TOASTER ABSTRACT An electric toaster (100) comprising: an upper housing (104) pressed over a lower housing (102) to roast slices of bread. The upper housing (104) comprises: a countdown timer (120) to count to a pre-determined time duration; and a power indicator (122) to generate a signal indicating a power supply status of the electric toaster (100). The electric toaster (100) comprising: a pair of cooking plates (106a-106b) having toasting surfaces brought into contact with opposed surfaces of the slices of bread; a handle (108) comprises a pressure sensor (126) to sense a pressure applied on the handle (108); and a control unit (110) to: receive the generated signal and the sensed pressure; compare the sensed pressure with a pre-defined pressure; activate the countdown timer (120), when the sensed pressure is less than the pre-defined pressure; and generate an alert by a sound unit (124) when the pre-determined time duration is elapsed. Claims: 10; Figures: 3 Figure 1 is selected.
