(57) Abstract :

Title: SYSTEM AND METHOD FOR CONTROLLING CHARGING OF COMPUTING DEVICES ABSTRACT A system (100) for controlling a charging of a computing device (102). The system (100) comprising:a device charger (104) for charging a battery (110) of the computing device (102);a charge control application (108) to provide an interface (116); a processing unit (112) configured to:enable a user to provide an input of a threshold charging value, when the computing device(102) is plugged in to the device charger (104); transmit a charging initiation signal to the device charger (104) to continue charging the battery(110) of the computing device(102); determine a batterycharging value of the computing device(102); compare the determined batterycharging value of the computing device(102) with the threshold charging value; and transmit a cutoff charging signal to the device charger (104) to discontinue the charging of the computing device(102), when the determined batterycharging value reaches the threshold charging value. Claims: 10, Figures: 4 Figure 1 is selected.
