(57) Abstract :

An edible washing apparatus (100) comprising: a sprinkler (106) rotated at 360 degrees to sprinkle water onto edibles; a water pump (108) to pump the water to the sprinkler (106); wheels (114a-114b) rotated at 360 degrees to rotate edible baskets (118a-118n); a drying fan (132) to remove water droplets from the edibles; a control unit (140) activates the water pump (108) for a first time interval; measure the first time interval; compare the measured first time interval with a first pre-defined time interval; deactivate the water pump (108) when the first time interval reaches the first pre-defined time interval; activate the drying fan (132) for a second time interval; measure the second time interval; compare the measured second time interval with a second pre-defined time interval; and deactivate the drying fan (132) when the second time interval reaches the second pre-defined time interval.
