(57) Abstract :
The present disclosure relates to a system for suggesting one or more products to a user. The system includes a rear-view mirror, an image capturing device configured at a top-end of the rear-view mirror. The rear-view mirror is configured to capture one or more images of a user's, standing in front of the rear-view mirror, face. A processor operatively configured with the image capturing device. The processor is configured to receive, from the image capturing device, the one or more images of the user's face. Determine, based on the one or more images, using a technique one or more attributes of the user. The one or more attributed comprises any or combination of a skin type, skin problem, a hair type, and hair problem of the user. Suggest, based on the determination, the one or more products, that are most suited for the user, of a plurality of products.
