(57) Abstract :  
 The present invention relates to an apparatus 100 and method 700 for cleaning a water storage tank. The apparatus 100 is fixed within the water storage tank to clean base and sidewalls of the water storage tank. The apparatus includes fixed brushes 120 to clean the base and movable brushes 122 attached to clean the sidewalls of the water storage tank. A handle 104 is provided on the apparatus 100, a user may rotate the handle 104 in clockwise direction to move internal components and brushes to clean the water storage tank entirely. and the handle Additionally, a plunger 128 is attached to the apparatus, upon applying force on the plunger 128, wastewater and contaminants may be collected and dispensed outside from the water storage tank.
