(57) Abstract :

A multifunctional laptop carrying apparatus (100), comprising: a lower case (102) to keep a laptop; an upper case (106) attached to the lower case (102) through an attachment means (108), and is closed to cover the laptop, wherein an inner surface (104) of the lower case (102) and an inner surface (110) of the upper case (106) are fabricated with cushioning material; air vent perforations (114a-114n) provided on an outer surface of the upper case (106) to enable air to pass through to avoid overheating of the laptop placed on the upper case (106), when the apparatus (100) is used as a laptop stand; slots (118a-118m) provided on both sides of the lower case (102); and a foldable strip (120) provided on the upper case (106), and inserted in one of, the slots (118a-118m) from the both sides to adjust a height of the upper case (106).
