(57) Abstract :

A laptop stand (100), comprising: a top portion (102) designed to be inclined at a predefined angle to hold a laptop; a bottom portion (104); magnetic catchers (106a-106b) fixed at a pre-defined location on a bottom surface of the top portion (102) and on a top surface of the bottom portion (104), to temporarily hold the top portion (102) and the bottom portion (104) together, when the laptop stand (100) is used for straight position; cavities (110a-110b) positioned at a center of the bottom surface of the top portion (102) and the top surface of the bottom portion (104) of the laptop stand (100), to hold a ball (112), wherein the ball (112) enables an easy rotation of the top portion (102) of the laptop stand (100) at any angle to adjust an angle of view of the laptop.
