(57) Abstract :

The present disclosure provides an invitation box (100) to interactively invite guests to a wedding or other event with an invitation. When the invitation box (100) is opened, a sound is played, information is shown on a display device (118), and lessen the stench by improving recipient's mood by spreading an aroma. Also, the proposed invitation box (100) includes an exhaust fan (108) that circulates carbon dioxide gas produced by a dry-ice storage mean (106) to absorb heat from inside the body (102) and expel heat through the exhaust fan (108). As a result, the body (102) is filled with cool air that keeps the food fresh for a long time.
