(57) Abstract :

The present disclosure relates to a system for managing one or more assets associated with an area of interest. The system includes one or more first transmitting devices associated with the one or more assets in an area of interest. A receiving device configured at a pre-defined position of the area of interest. The system is configured to receive, from the one or more first transmitting devices, a first set of signals pertaining to a movement of the one or more assets outside the area of interest. The system being configured to determine a location of the one or more assets outside the area of interest based on the first set of signals. The processor being configured to transmit, based on the determined location, to the one or more indicating devices, a second set of signals.
