(57) Abstract :

A device 100 to secure, control, and locate a pet animal 102 comprises a collar 104, a housing 202 detachably coupled to the collar 104, wherein the housing 202 comprises a leash 108, a buzzer 212, a plurality of buttons, a GPS module 208, and a control unit 204 configured to receive radio signal from a mobile device held with the user 106 to activate the buzzer 212 and transmit live location signals of the device 100. A rechargeable battery 216 coupled to the device 100 to supply power. In case of escape of the pet animal 102, search is possible by the user 106 through GPS tracking and hearing of the buzzer 212.
