Address of Applicant :Associate Professor, Department of Chemistry, Tumkur University, Tumkur - 572103, Karnataka, India. Tumkur -----

(57) Abstract :

The disclosed embodiments illustrate a system (100) and method (300) for monitoring a person and controlling drug delivery by a health practitioner from a remote location. The system (100) includes a portable apparatus (112) that is an infusion pump and have one or more syringes, and required drugs are filled in the one or more syringes by an attendant, further the health practitioner activates through a computing device (116), at least one of the one or more syringes to deliver an instructed quantity of drug in body of the person. Additionally, the health practitioner receives one or more health attributes of the person from one or more sensors (106) attached to the person, and correspondingly controls the apparatus. Thus, assisting the person that is at a distance from the health practitioner in emergency conditions and saves life, by inducing required drugs the person's body on time.
