Address of Applicant :ODC-4, Panchshil Tech Park, inside Courtyard by Marriott premises, Hinjewadi Phase - 1, Pune - 411057, Maharashtra, India. Pune -----

(57) Abstract :

The present disclosure relates to system (100) and a method (400) for hiding data in digital images. The system includes an input device (102) configured to receive an original image and text data, and a processor (104). The processor (104) is configured to receive, from the input device 102, a first set of signals pertaining to the original image, and a second set of signals pertaining to the text data, convert the received text data into a binary signal, and inject the converted binary signal into the original image using a Least Significant Bit (LSB) steganography, and correspondingly an encoded image is generated that is stored in a database.
