(57) Abstract :

The present disclosure relates to a method for text to quick response (QR) code conversion. The method includes receiving, by a processor, a first set of signals pertaining to the text input from the input device. The method further includes generating, by the processor, a QR code corresponding to the text signal based on the first set of signals. The method further includes transmitting a second set of signals to the display device for displaying the generated QR code.
