(57) Abstract :

A system 100 for commode 104 is configured to move vertically by a user as per convenience between a first position 108 and a second position 110 within a set of wall mounted channels 112, a reservoir 104 and a press button 106, a lifting mechanism 118 coupled to the commode 102 comprises a press lever 122 operated by a user with a foot, and a set of locking knob 124. Once the commode 102 is used by the user, the press button 106 is used to flush and clear the excreta from the commode 102.
