(57) Abstract :
 The present disclosure provides a foot massaging sock assembly (100) to massage a foot using a fluid i.e. oil. The assembly (100) includes a sock (102) that is wearable on the foot of a user, and multiple components detachably coupled with the sock (102) that enables massaging the foot. The multiple components include one or more massagers (104) detachably coupled to the sock to massage the foot when said sock is worn. In addition, a compartment (108) mounted on the sock to store the fluid in the sock, and the fluid is dispensed from the compartment (108) to the sole of the foot, and the fluid is rubbed on the sole of the foot using the one or more massagers (104) to massage the foot with the fluid.
