Address of Applicant :ODC-4, Panchshil Tech Park, inside Courtyard by Marriott premises, Hinjewadi Phase - 1, Pune - 411057, Maharashtra, India. Pune -----

(57) Abstract :

The present disclosure discloses a method and a system for detecting clickjacking. It involves identifying, through a detection module comprising a processor coupled with a memory, a user interface (UI) on which a user has to click; classifying, at the detection module, by processing the identified UI as any of real UI and redressed UI, and correspondingly confirming an event of clickjacking; and triggering, at the detection module, a set of warning signals, in case the clickjacking is confirmed. Further, it involves receiving, at an output terminal operatively coupled to the detection module, the triggered set of warning signals, and correspondingly generate an alert. It also involves detecting frameable response as a function of possible clickjacking, and correspondingly confirming the clickjacking.
