(57) Abstract :
 PORTABLE DEVICE FOR DRYING HAIR A device 100 for drying hair at a controlled temperature, the device 100 includes a 5 head bonnet 102 with an inner wall 108 and an outer wall 110. The head bonnet 102 includes a heating unit 120 and a blower unit 118 between the inner and outer walls. The heat toward the hair is directed through the air apertures 106 of the inner wall 108. The top of the head bonnet is configured with a plurality of vent holes 114 to dispose of the hot air to atmosphere. Furthermore, a thermosensor 126 10 positioned in air chamber 104 between outer wall and inner wall to sense the temperature and a moisture contents indicator is positioned near the vents for sensing the moisture contents of the hair and automatically switches off the system when detects the moisture contents of hair are less than the limit.
