(57) Abstract :

Embodiments of the present disclosure disclose a system 100 may include a decentralized database 112 connected to a blockchain network 106 to a plurality of user devices 104. The decentralized database 112 is communicatively coupled with an AI engine 108, the AI engine may include a processor 202 operatively coupled with a memory 204. The processor 202 receives a request to generate a bill from at least one of the user devices and the request includes type of format and required columns and rows. Additionally, the processor 202 generates the bill and plurality of documents received, corresponding to the received users' requirements. Moreover, the processor is further enabled to evaluate one or more parameters in the plurality of documents, corresponding to amount and information of one or more commodities received.
