(21) Application No.202311000371 A

(19) INDIA

(22) Date of filing of Application :03/01/2023

(43) Publication Date : 13/01/2023

(54) Title of the invention : SYSTEM FOR DIGITALLY REQUESTING AND PROVIDING FUEL DELIVERY AND METHOD THEREOF

(51) International classification :H04W0012060000, H04M0003560000, G06Q0020320000, H04L0051420000, G16H0040200000

(86) International Application No :NA

Filing Date :NA

(87) International Publication No : NA

(61) Patent of Addition to Application Number :NA

Filing Date :NA

(62) Divisional to Application Number :NA

Filing Date :NA

(71)Name of Applicant :

1)Chitkara University

Address of Applicant :Chitkara University, Chandigarh-Patiala National Highway, Village Jhansla, Rajpura, Punjab - 140401, India. Patiala -----

2)Bluest Mettle Solutions Private Limited

Name of Applicant : NA

Address of Applicant : NA

(72)Name of Inventor :

1)KUMAR, Naveen

Address of Applicant :Chitkara University, Chandigarh-Patiala National Highway, Village Jhansla, Rajpura, Punjab - 140401, India. Patiala -----

2)MISHRA, Rahul

Address of Applicant :ODC-4, Panchshil Tech Park, inside Courtyard by Marriott premises, Hinjewadi Phase - 1, Pune - 411057, Maharashtra, India. Pune -----

3)SINGH, Dhiraj

Address of Applicant :ODC-4, Panchshil Tech Park, inside Courtyard by Marriott premises, Hinjewadi Phase - 1, Pune - 411057, Maharashtra, India. Pune -----

(57) Abstract :

The present disclosure relates to a system for digitally requesting and providing fuel delivery. The system comprises computing device(s) associated with user(s) and fuel provider(s), and a server. The server allows the users to request fuel delivery at their current or desired location along with the type and amount of fuel required using their computing device. The server then shares the request on the computing devices of the fuel providers. The fuel providers then confirm the availability of the required fuel and their current location using their computing devices. Further, the server selects or allows the users to select at least one of the fuel providers to deliver the fuel. The server also generates a detailed invoice and allows the users to make payments for fuel delivery.
