 Address of Applicant :ODC-4, Panchshil Tech Park, inside Courtyard by Marriott premises, Hinjewadi Phase - 1, Pune - 411057, Maharashtra, India. Pune -----

(57) Abstract :

Embodiments of present disclosure may include a system (100) to block the flash drives from connecting to a device, the system including a processor (102) and a memory (104). The processor can be configured to receive an instruction, upon detection of at least one flash drive in a port of any of a plurality of computing devices (112), and the plurality of computing devices (112) are communicatively coupled through a network (108). Additionally, based on the instruction received, determine in which computer the flash drive is connected, and compare whether an ID of the flash drive is in a list of IDs for a set of flash drives, which gives access to read and write data from the associated computing device, and blocks the flash drive when the ID is not in the list of the associated computing device.
