 Address of Applicant :Department of Computer Application, CUIET, Chitkara University, Chandigarh-Patiala National Highway, Village Jhansla, Rajpura, Punjab - 140401, India. Patiala -----

(57) Abstract :
 The present disclosure relates to a clock with calendar comprising a wireless transceiver (114), a remote-control unit (110), a display unit (108), and a processing unit (104) configured in a housing (102). The processing unit receives, one or more operation signals from the one or more users through the remote-control unit. The received one or more operation signals are processed by the processing unit. The processing unit connects the wireless transceiver (114) with a network (112) to receive the calendar data from the network (112). The clock and the calendar information are updated and displayed in the display unit (108). The system (100) uses Really Simple Syndication (RSS) feed technology to get calendar data from one or more websites and update the calendar information.
