(57) Abstract :

ABSTRACT A system (100) for recording a digital content using an unmanned air vehicle (102) is disclosed. The system (100) comprising: a hand control set (104) adapted to read hand gestures of a user. The unmanned air vehicle (102) receives the operational commands and a selected mode from the hand control set (104). The system (100) is configured to actuate motors (122a-122d) and propellers (124a-124d) for enabling maneuvering of the unmanned air vehicle (102) based on the received operational commands. The system (100) is further configured to record the digital content using a camera (116) in the selected mode. Claims: 10, Figures: 8 Figure 1A is selected.
