(57) Abstract :
ABSTRACT METHOD AND SYSTEM FOR AUGMENTED REALITY-BASED SPEECH AND LANGUAGE DISORDER ASSESSMENT A method (100) for providing an augmented reality -based speech and language disorder assessment with real-time feedback. The method (100) comprising registering a patient by creating a playcard. The playcard comprises a unique identification code, scanning of a created playcard through a computing device, connecting the computing device with an augmented reality speech and language disorder system to provide an assessment to the patient. Moreover, the assessment comprises a set of activities and tasks, analysing the activities and actions performed by the patients; and generating assessment report and providing feedback to the patient.
