(57) Abstract :

A blockchain system for digital securities transmission 100 includes a processor 102 and a memory 104 coupled with blockchain ledger 106, and said memory 104, comprising a set of instructions, which when executed, cause the processor 102 which aims at getting the benefits of the blockchain digital technology. The invention addresses the digital securities issues that arise during information exchange over cloud. The invention focuses on securing the data packets with encryption techniques such that the block chain system routes packets to the destined user.
