(57) Abstract :

The present invention relates to a writing instrument (100) including a barrel (102) a first member (108) accommodating an ink reservoir (116) and a detachable writing tip (112) mounted at a top end of the first member, and a second member (110) positioned with a cylindrical cavity (118) adapted to removably store a chalk stick. The second member (118) also includes a gripping portion for holding the received chalk stick and a spring mechanism (120) for facilitating its use. The writing instrument (100) further includes a cap (130) detachably coupled to the first end of the barrel with a laser module (130) configured to emit a laser beam and powered by a battery located within the cap. This writing instrument (100) provides a versatile writing instrument that allows for both writing and drawing with ink and chalk, as well as a laser pointer for presentations or other uses.
