

(12) PATENT APPLICATION PUBLICATION

(21) Application No.202311045154 A

(19) INDIA

(22) Date of filing of Application :05/07/2023

(43) Publication Date : 04/08/2023

(54) Title of the invention : AI BASED ANDROID DATA ANALYSIS SYSTEM

(51) International classification	:G06F 161600, G16B 250000, H04L 016220, H04N 214430, H04N 216100
(86) International Application No	:NA
Filing Date	:NA
(87) International Publication No	: NA
(61) Patent of Addition to Application Number	:NA
Filing Date	:NA
(62) Divisional to Application Number	:NA
Filing Date	:NA

(71)Name of Applicant :

1)Chitkara University
Address of Applicant :Chitkara University, Chandigarh-Patiala, National Highway, Village Jhansla, Rajpura, Punjab - 140401, India. Patiala -----

2)Bluest Mettle Solutions Private Limited
Name of Applicant : NA
Address of Applicant : NA

(72)Name of Inventor :

1)MISHRA, Saket
Address of Applicant :ODC-4, Panchshil Tech Park, inside Courtyard by Marriott premises, Hinjewadi Phase - 1, Pune - 411057, Maharashtra, India. Pune -----

2)SINGH, Dhiraj
Address of Applicant :ODC-4, Panchshil Tech Park, inside Courtyard by Marriott premises, Hinjewadi Phase - 1, Pune - 411057, Maharashtra, India. Pune -----

3)MITTAL, Ruchi
Address of Applicant :Chitkara University, Chandigarh-Patiala National Highway, Village Jhansla, Rajpura, Punjab - 140401, India. Patiala -----

(57) Abstract :

A system for analyzing data generated by Android devices, comprises a data collection module for collecting data from various sources on Android devices, a data processing module for processing the collected data using artificial intelligence algorithms and techniques, a face recognition and voice command recognition module by analyzing photos and sounds, and an analysis module for analyzing the processed data to gain insights into user behavior, preferences, and habits. The data collection module collects data from various sources, including but not limited to apps, sensors, and other features, on Android devices. The data is then transmitted to the data processing module for further analysis. The data processing module uses machine learning, deep learning, and other AI techniques to process the data and extract insights. The data is processed in real-time or near real-time, allowing the system to quickly identify trends and patterns in the data. The data processing module uses machine learning, deep learning, and other AI techniques to process the collected data. The analysis module analyzes the processed data to gain a deeper understanding of user behavior, preferences, and habits. The analysis includes but is not limited to predictive maintenance, personalization, and optimization of battery life, network usage, and app performance. The insights generated by the analysis are used to improve the overall user experience and drive innovation in the field of mobile technology. The analysis module generates insights into user behavior, preferences, and habits, which are used to improve the overall user experience and drive innovation in the field of mobile technology.
