(57) Abstract :

The present disclosure relates to a system (100) and method for creating a secure online dating platform using anonymous credentials. The method for creating a secure online dating platform using anonymous credentials begins with obtaining (202), by a processor, personally identifiable data from the user. Next, the method processes and stores (204), by the processor, the personally identifiable data of the user for successful registration of the user with the secure online dating platform. Next, the method encrypts (206), by the processor, the personally identifiable data of the user after the successful registration of the user with the secure online dating platform. In the end, the method connects users (208), by the processor, at the secure online dating platform using anonymous credentials.
