(57) Abstract :

Embodiments of the present disclosure provide a system (100) and method (200) of blocking advertisement content based on Raspberry-Pi. In an aspect, the present disclosure provides a method (200) of blocking advertisement content based on Raspberry-Pi. The method (200) begins with analysing (202), by a processor (102), network traffic in real-time. Next, the method (200) blocks (204), by the processor (102), the advertisement content and internet trackers at a DNS level based on the analysis. Thereafter, the method (200) creates (206), by the processor (102), blacklists and whitelists through real-time monitoring of the blocked advertisement content. In the end, the method (200) generates (208), by the processor (102), a statistical report of the blacklists and whitelists.
