(57) Abstract :

Embodiments of the present disclosure relates to a system (100) and method (300) for blocking screen recording attempts. The system comprises a processor (202) coupled to a memory (204). The memory (204) stores processor-executable instructions. The processor (202) is configured to detect a screenshot attempt in real-time. Further, the processor (202) is configured to encrypt data flowing across one or more networks in real-time based on the detected screenshot. Next, the processor (202) is configured to keep track of a source of the detected screenshot attempt. In the end, the processor (202) is configured to block the tracked screenshot attempt
