(57) Abstract :

The present disclosure relates generally to the field of compliance management. More specifically, the present disclosure relates to a compliance management system. Further the present invention relates to a method for managing compliance in an organization using a compliance management system. The compliance management system (100) includes a cloud server (102), at least one user interface (104), a plurality of compliance devices (106) embedded with predefined compliance algorithms, a database (108), a reporting device (110), a processor (112) and an alert device (114). The compliance device (106) evaluates compliance data and identifies compliance issues, and the user interface (104) presents a plurality of compliance reports to the users. More particularly the present invention relates to systems and methods for managing and monitoring compliance with regulations, laws, and company policies. Advantageously the present invention relates to a flexible, adaptable, and scalable compliance management system.
