(57) Abstract :

A system (100) and a method (200) for providing cloud security consulting services is provided. The system (100) includes a cloud security consulting bot (102), an intelligent chatbot component (104) and a plurality of user interfaces (106) to offer cloud security consulting services to businesses utilizing cloud computing services. The system (100) offers personalized advisory services, delivering customized tips, best practices, and recommendations tailored to the specific needs of each user. The system (100) is cost-effective, making cloud security guidance accessible to businesses with limited resources. The system (100) is designed to be user-friendly and accessible through various interfaces, ensuring convenience and rapid access to relevant information. It also allows for customization, scalability, and upgradability, enabling businesses to align their cloud security plans with industry regulations and emerging security trends.
