(57) Abstract :

Embodiments of the present disclosure relates to a system (100) and method (300) for UAV data management and analysis. The system comprises a processor (202) coupled to a memory (204). The memory (204) stores processor-executable instructions. The processor (202) is configured to collect UAV data from a plurality of sources. Further, the processor (202) is configured to store the collected UAV data. Next, the processor (202) is configured to process the stored UAV data. In the end, the processor (202) is configured to analyse the processed UAV data.
