1)KHULLAR, Vikas

Address of Applicant :Associate Professor, Department of Computer Science and Engineering, Chitkara University Institute of Engineering and Technology, Chitkara University, Chandigarh-Patiala National Highway, Village Jhansla, Rajpura, Punjab - 140401, India. Patiala -----

(57) Abstract :

Embodiments of the present disclosure relates to a system (100) and method (300) for detecting abusive speech in live communication channels. The system comprises a processor (202) coupled to a memory (204). The memory (204) stores processor-executable instructions. The processor (202) is configured to obtain a voice input from a user. Further, the processor (202) is configured to extract one or more features from the obtained voice input. Next, the processor (202) is configured to analyse the extracted one or more features. In the end, the processor (202) is configured to detect the abusive speech based on the analysed one or more features.
