(57) Abstract :

Embodiments of the present disclosure relates to a system (100) and method (300) for creating floor plans using digital tools. In an aspect, the present disclosure discloses a system (102) for creating floor plans using digital tools. The system (102) comprises a processor (202) coupled to a memory (204). The memory (204) stores processor-executable instructions. The processor (202) is configured to receive an input from a user. Further, the processor (202) is configured to interpret the received input from the user. Next, the processor (202) is configured to generate a floor plan based on the interpreted input. In the end, the processor (202) is configured to store the floor plan in a database
